PROFESSIONAL PRODUCTS

IMPERIAL SUPER-LIFT TREATMENT

The lifting innovation for the professional treatment in the salon. Can be used as a one-off effect treatment or as a treatment application!

The treatment contains:

Imperial Peeling Pearls · 6 g

Caviar Push-Up Concentrate · 4 ml

Imperial Super-Lift Gel · 6 ml

Art. no. 510

MAIN ACTIVE INGREDIENTS OF THE SERIES

DNA marin:

High quality active ingredient complex made of roe, carrier of genetic cell information, intensive moisture supply to deeper skin layers, synthesizes ATP in the cells, stimulates the skin's own repair system

Hydrolite®:

Stimulates the synthesis of hyaluronic acid, regenerates the hydro-lipid mantle

Vitamin A-Palmitate:

Increases collagen production, improves skin elasticity, regenerates UV-damaged skin

Macadamia nut oil:

Rich in unsaturated fatty acids, excellent skin nourishing properties, skin smoothing

Panthenol:

Effective repair and protective action, increases the skin's water-binding capacity, supports the healing process, anti-inflammatory

Sorbitol:

Hexavalent sugar alcohol, moisturizing

IMPERIAL PEELING PEARLS

Skin type:	pH:
All skin types	4.2–4.8

Active ingredients: Marine polysaccharides, microsilica (granulate)

Properties: All pearls contain a unique formula. By applying pressure and rubbing on the skin, the three-dimensional structure of the pearl breaks, forming a protective film on the surface of the skin. Marine polysaccharides offer an active base, which fully melts into the skin. A light and melting texture, enriched with silk extracts. Microsilica act as granules, small microparticles, which gently remove dead skin cells from the skin.

Directions: See treatment suggestion

CAVIAR PUSH-UP CONCENTRATE

Skin type:	pH:	Emulsion type:
All skin types	6.0–7.0	Aqueous solution

Active ingredients: DNA marine extract, Hydrolite, oyster extract, caviar extract, Matrixyl, tannins, nano-retard hyaluronic acid

Properties: DNA marine extract, Hydrolite and oyster extract activate the cell metabolism through their mineral complex, cellular respiration is increased and the repair process promoted. Caviar is excellent for skin with an impaired skin biorhythm and accumulated toxins. Nutrients can no longer be absorbed. Caviar enhances the skin's basic care. Matrixyl, a super peptide that acts like a soft focus on the skin. The skin is also supported with increased moisture and a strengthened natural barrier function. Nano-retard hyaluronic acid supplies the skin with moisture over 12 hours. Tannins have a toning and firming effect. A unique cocktail of various highly effective active ingredients.

Directions: See treatment suggestion

IMPORTANT: The skin must be dry as the mask will otherwise not fully unfold its action.

IMPERIAL SUPER-LIFT GEL

Skin type:	pH:	Emulsion type:
All skin types	10.0–11.0	Gel

Active ingredients: Soy extract, herbal and plant extracts, peptides

Properties: Herbal and plant extracts as well as peptides release their effect and reveal an immediate lifting effect. The skin is firmed and moisturized, dark spots can be lightened and pores shrunk. Wrinkles are reduced and the skin elasticity is improved. The face looks as though it was lifted.

Directions: See treatment suggestion

IMPORTANT : The mask can feel very tight on the skin. The customer should be made aware of this as she will not have experienced this with any other Klapp treatments yet. In case of thyroid problems, do not apply the mask in this area!

TREATMENT INSTRUCTIONS

1. Cleansing: CLEAN & ACTIVE CLEANSING LOTION (Art. no.: 201)

2. Peeling Pearls: Place the Imperial Peeling Pearls on the facial skin and apply gentle pressure with the hands. The exclusive pearls burst and release fine peeling beads, perform a gentle massage for approx. 5 minutes and remove with warm compresses. Tone the skin.

3. Caviar Push-up Concentrate: Work the Caviar Push-Up Concentrate into the skin, applying a pressure point massage and leave to absorb completely.

4. Imperial Super-Lift Gel: Apply a thin layer of the Imperial Super-Lift Gel with a brush (if the content is not fully used up, dispose of the excess). Apply from the center of the neck or of the face outwards in long strokes and from the neck upwards in the direction of the forehead. Emulsify with dampened fingers after approx. 15 minutes and remove with 1–2 warm compresses. Tone the skin.

IMPORTANT: The mask can feel very tight on the skin. The customer should be made aware of this in advance as she will not have experienced this with any other Klapp treatments yet. In case of thyroid problems, do not apply the mask in this area!

TIP: If a massage is to be applied, we recommend performing a massage after cleansing with X-Treme Deep Cleansing (Art. no.: 661).
