HYALURON INFUSION

The X-TREME HYALURON INFUSION treatment and skin care is a real miracle weapon for building new moisture depots and long-term supply with hyaluronic acid, the most important component of connective tissue for storing moisture and for preserving the tissue's resistance against pressure. The advanced ingredients restore the skin's elasticity, leaving it smooth and hydrated. Unwanted lines and wrinkles are visibly reduced.

The treatment contains:

MICRO PEEL · 7 ml

RETARD GEL · 5 ml

INTENSIVE CREAM STEP 1 · 20 ml

INTENSIVE CREAM STEP 2 · 40 ml

Art. no. 660

MAIN ACTIVE INGREDIENTS OF THE SERIES

Sericin:

Natural silk protein, forms a homogeneous protective film: protects the skin against dryness, increases the resilience, offers a silky skin feel

Ceramides:

Important part of the epidermis, can be found within the cell, skin-physiological effect, intensive regeneration, skin care and tightening

Vitamin A-E-F:

Components of life, needed for metabolism processes

Almond oil (*Prunus dulcis*):

Rich in nutrients, mild natural oil, extracted from almond seeds through cold pressing, the oleic acid content can be 60–90 %, the linoleic acid content is 17 %, soothing effect

Sunflower oil (*Helianthus annuus*):

Extracted from the seeds of the sunflower, rich in unsaturated fatty acids, 34 % oleic acid and 58 % linoleic acid, rich in vitamin E, sensitive to oxidation, protects the skin and increases elasticity

Brazil nut oil (*Bertholletia excelsa*):

Extracted from the seeds of the Brazil nut tree, rich in vitamins and mineral nutrients, leaves the skin soft and smooth

Sponge gourd (*Luffa cylindrica*):

The oil is high in linoleic acid, regulates the lipid barrier of the skin

Ceramide III:

Made from natural raw materials through bio-fermentation, support the skin with skin-like fatty acids, regulate the natural lipid balance, protect against moisture loss

Arbutin:

Extracted from berry leaves, rich in tanning agents, brightening effect, prevents the formation of melanin and thus a new pigmentation, has to be applied twice a day over a period of at least 6–8 weeks

Nasturtium (*Tropaelum majus*):

Rich in vitamin C, brightening effect

Hyaluronic acid:

See description under "Hyaluronic" (all 3 types)

FOR EVERY SKIN TYPE

MICRO PEEL

pH:	Emulsion type:
5.0–6.0	O/W emulsion

Active ingredients: Glycerin, sorbitol, pentylene glycol, synthetic abrasive particles

Properties: Moisturizing peeling

Directions: Apply to the face and massage in gently. Avoid the eye area. Carefully remove any remaining product residue with water and a warm compress after the application.

RETARD GEL

pH:	Emulsion type:
5.0–6.0	Gel

Active ingredients: Low molecular weight and high molecular weight hyaluronic acid, sorbitol, glycerin

Properties: Immediate, long-lasting moisture effect

Directions: Apply the gel to the skin and massage in briefly. Work product residues into the skin.

INTENSIVE CREAM STEP 1

pH:	Emulsion type:
5.0–6.0	O/W emulsion

Active ingredients: High molecular weight hyaluronic acid, sorbitol, glycerin, squalane, yeast extract, papaya fruit extract, ATP

Properties: Rich cream, intensive moisture supply, forms a protective film on the skin

Directions: Apply the cream to the face and fix with a bandage.

INTENSIVE CREAM STEP 2

pH:	Emulsion type:
5.0–6.0	O/W emulsion

Active ingredients: Sorbitol, glycerin, squalane, pentylene glycol

Properties: Enhances the action of the INTENSIVE CREAM STEP 1

Directions: Apply the cream on the bandage like an occlusive dressing. Remove the bandage after approx. 10 minutes.

X-TREME HYALURON INFUSION – TREATMENT PROCEDURE

- Cleansing:** Depending on the skin condition, cleanse with either the CLEAN & ACTIVE CLEANSING LOTION (Art. no.: 201) or the GEL (Art. no.: 202).
- Peeling:** Apply the MICRO PEELING, massage into the skin and leave to work for 2–5 minutes. Remove with a warm compress, then tone.
- Tonic:** Tone with CLEAN & ACTIVE TONIC WITHOUT ALCOHOL.
Apply the RETARD GEL (low molecular and high molecular active ingredient weight hyaluronic acid) with a fan brush and gently work concentrate into the skin.
- Mask:** Apply the INTENSIVE CREAM STEP 1 (high molecular weight hyaluronic acid) with a fan brush until a layer becomes visible on the skin. Apply four to five bandages from the base of the neck in strips crosswise, applying gentle pressure. Then fix into place with a bandage of approx. 70 cm.

Apply the INTENSIVE CREAM STEP 2 with a fan brush on the bandages and work into the skin for approx. 10 minutes. Remove all bandages from the bottom to top. Work any remnants of the mask into the skin, performing a pleasant massage.
- Finishing care:** Dab off any excess with a facial tissue. The result is a well moisturized and rich skin, which does not need any kind of skin care products.
