## THE INNOVATIVE ANTI-AGE ACTIVE INGREDIENT COMPLEX TCR3-PLUS®

The beauty experts of the REPACELL® cosmetics research team developed the unique active ingredient complex Telovita Cell Reactivator 3-Plus, short TCR3-PLUS®, for your anti-aging facial skin care. TCR3-PLUS® can prolong the longevity of the cells. The prolonged longevity of the cells can promote the youth of the skin: The skin looks fresh, smooth and radiant for longer. The skin appears younger long-term.

## MAIN ACTIVE INGREDIENTS OF THE SERIES

TCR3-PLUS®: Telovita Cell Reactivator 3-Plus is composed of:

**Proteolea®:**

Cell Cleanser – removes cellular toxic waste –

composed of natural components:

Olive leaf, jujube berries (Chinese date) and polysaccharides from fruit molecules:

Activates the proteasome = Nobel Prize winning recycling system of the cells.

Delays cellular skin aging through detoxifying and cell life prolonging properties.

Delays cellular skin aging and cell life prolonging properties.

Strengthens the antioxidant defense system to activate vitalizing properties.

Forms a firming, moisturizing protective film.

**Vitasource®:**

Telomerase activator – protects the telomere length –

innovative active ingredient to delay dermal senescence (Latin "scenescere" = to age) –

composed of natural components of the Baikal skullcap:

Stimulates the cell division by up to 5 additional divisions.

For example, instead of 50 divisions - now 55 divisions.

Improves the skin restructuring process.

Increases firmness, tightness and elasticity.

Prolongs the youthful, vibrant look by 10 years.

**Skin Regenerator – supports skin renewal –**

**from natural stem cells from the beach thistle:**

Skin protection and stress neutralizer against free radicals and redness.

Protection and stimulation of the dermo-epidermal connection in the basal layer of the skin.

Supports the skin elasticity.

Positive effects on the skin's metabolism.

Regulates the keratogenesis.

Balances pigmentation disorders through tyrosinase inhibition.

Stimulation and protection of the skin's own collagen.

Regeneration and rejuvenation of the skin.

For skin luminosity, firmness, overall protection, regeneration and brightening.

A luxurious pampering program for sensitive to normal skin. The perfectly matched products nourish and soothe the skin. The innovative anti-age active ingredient TCR3-PLUS® can prolong cell life and leaves the skin with a fresher, smoother and more radiant look.

The REPACELL® products do not contain any parabens or silicone oils.

It can protect the telomeres in the skin day and night, maintain the longevity of the skin cells and their functionality, thus prolonging their youthfulness.

## EXTRA ANTIAGE TREATMENT – TREATMENT PROCEDURE

HC251

- Cleansing:** Apply the Cleansing Cream Mousse for thorough cleansing to the damp face, spread and massage gently into the skin. Remove with a warm moist compress and tone the skin afterwards.
- Peeling:** Apply the Extra Antiage Enzyme Peeling to the face, spread and perform an invigorating pressure point massage for approx. 20 minutes. Carefully remove any remaining product residue with water and a warm compress after the application.
- Serum:** Shake the Extra Antiage Liquid Serum before use, apply a few drops on the skin and leave to absorb for 5–7 minutes.
- Mask:** Remove the mask from the packaging and remove the protective sheets. Carefully unfold the mask halves, place on the face and press down lightly with your fingertips. Leave to rest for 15–30 minutes on the skin, pressing it down gently occasionally. Remove the mask and massage the remnants into the skin.
- Finishing care:** Apply the 24H Antiage Luxurious Cream as finishing care and massage gently into the skin.
